

Real  Care  
An ISO 9001 : 2008 Certified Company

## INTRODUCTION

Over the last three decades, we have emerged as a key partner of the healthcare sector in India. Our product range extends from surgical dressings to disposable drapes & gowns, thereby encompassing the critical elements that help you deliver on customer expectations and making your business a success.

We have been privileged to work with a diverse range of customers ranging from large corporate hospitals to local nursing homes. Our customers have consistently placed their faith in our products and services and have helped us grow from a manufacturing unit into an organization of much superior expertise. Our experiences over the last 3 decades have helped us to develop critical insight into the requirements of healthcare providers.

We have translated this insight into 3 focus areas.

**Insight** – We understand the unique requirements of small and large organizations alike. We believe in working closely with our customers to transform their material needs into customized products.

**Delivery** – We consider ourselves to be solution providers to our healthcare partners, combining quality products with consistent and timely delivery service.

**Quality** – As an experienced contributor to the healthcare sector, we understand that there can never be any compromise over quality. Accordingly, we lay strict emphasis on measuring quality and constantly upgrade our quality control processes to keep pace with globally acknowledged standards.

As the healthcare sector marches ahead into a new era of competitive growth amidst immense opportunity, our experience makes us suitably placed to partner your organization as you look towards constantly enhancing the quality of your services in a profitable way.

The background features a light blue and white color scheme with decorative elements. There are large, flowing, light blue swirls that create a sense of movement. Interspersed among these swirls are various snowflake and floral patterns in shades of blue and white. A central horizontal banner with a dark blue background and white text is positioned across the middle of the page. The banner is framed by ornate, dark blue scrollwork and snowflake designs.

# surgical dressings

## GAUZE SWABS X-RAY & PLAIN (STERILE AND NON STERILE)

- Gauze swabs are made of 100% natural cotton hydrophilic gauze
- Absorbency < 3 sec & Whiteness level > 82 %
- Grey fabrics are bleached by using hydrogen peroxide in an automatic machine, not using chlorine which is forbidden by all over the world.
- Low lint level is to eliminate lint in the wound cavity
- An x-ray thread incorporated in to the swabs decreases the risk during surgery .X-ray thread used is 60% barium sulphate and multifilament yarn which will be easy to detect in x-ray photos
- To eliminate the risk of free fibers release the edges of the swabs are folded inside
- Sterile gauze swabs are packed in medical grade paper / film peel able blister packing pouches sterilized by ETO
- Bacterial endotoxins is less than limit after sterilization which will not cause any reaction or side effect to the user
- Products are sterilized in a validated process to hold the sterile content and residue ethylene oxide below detectable level (BDL)

## LAP SPONGE OR MOPPING PAD X-RAY & PLAIN (STERILE AND NON STERILE)

- Lap sponge are made of pure cotton chlorine free bleached hydrophilic gauze
- An x-ray thread incorporated in to the sponge decreases the risk during surgery (60 % barium multifilament yarn )
- Each sponges feature a cotton loop for easy location & retrieval during surgery that increase the safety of use
- Lap sponge are assigned for straining large amount of systemic fluids from the OP field .
- Sterile Lap sponges swabs are packed in medical grade paper / film peel able blister packing pouches sterilized by ETO

## COMBINE DRESSING PAD (STERILE AND NON STERILE)

- The absorbent combine dressing pad have the absorbent core made of 100 % absorbent cotton placed between the layers of chlorine free bleached cotton gauze or medical non woven of high hydrophilic properties.
- The cotton significantly increases absorption capacity & keeps the wound dry.
- Combine dressing pad are especially recommended for dressing of high critical wounds.
- Sterile combine dressing pad are packed in medical grade paper / film peel able blister packing pouches sterilized by ETO

## GAMJEE ROLL (STERILE AND NONSTERILE)

- The absorbent gamjee roll have the absorbent core made of 100 % absorbent cotton placed between the layers of chlorine free bleached cotton gauze
- Gamjee roll are generally in different sizes & meters , so the end user can cut the dressing pad according to their size
- Gamjee roll are especially recommended for dressing of high critical wounds.
- Gamjee roll are packed in medical grade paper / film peel able blister packing pouches sterilized by ETO

## HIGH ABSORBENT DRESSING PAD

The high absorbent dressing pads have the absorbent core made of cellulose pulp placed between the layers of non woven. The pulp significantly increases absorption capacity of the pad .the swabs are especially recommended for dressing of high exudating wounds

## RIBBON GAUZE

In surgical cases ribbon gauze is used as a long sponge in walling off deep cavities as packing. To control bleeding and also as packing in kidney of prostatic surgery. Its mainly uses in an ENT surgery.

## ABSORBENT GAUZE THAN AND ROLLER BANDAGES

We produce and supply to our clients, a wide range of gauze roll that are hygienically made so that they are safe to use in various medical applications. We manufacture and provide roller bandages and gauze than those are generally provided by in several qualities and several sizes according to customer requirement. Roller bandages edges are evenly cut parallel to warp threads and are reasonably free from loose threads. Rolled bandages are used for different types of cuts, injuries, wounds etc. Strong and convenient, these medical bandage, gauze bandages are used when moderate compression is required.

## PERINEAL PAD

- A cushion of soft materials used to cover the perineum to absorb the menstrual fluids or to protect a wound.
- We provide sterile perineal pad is disclosed that in preferably of a disposable construction and has a thermal pack underlying that portion of it absorbent member that is to be in engagement with urogenital region of the perineum .

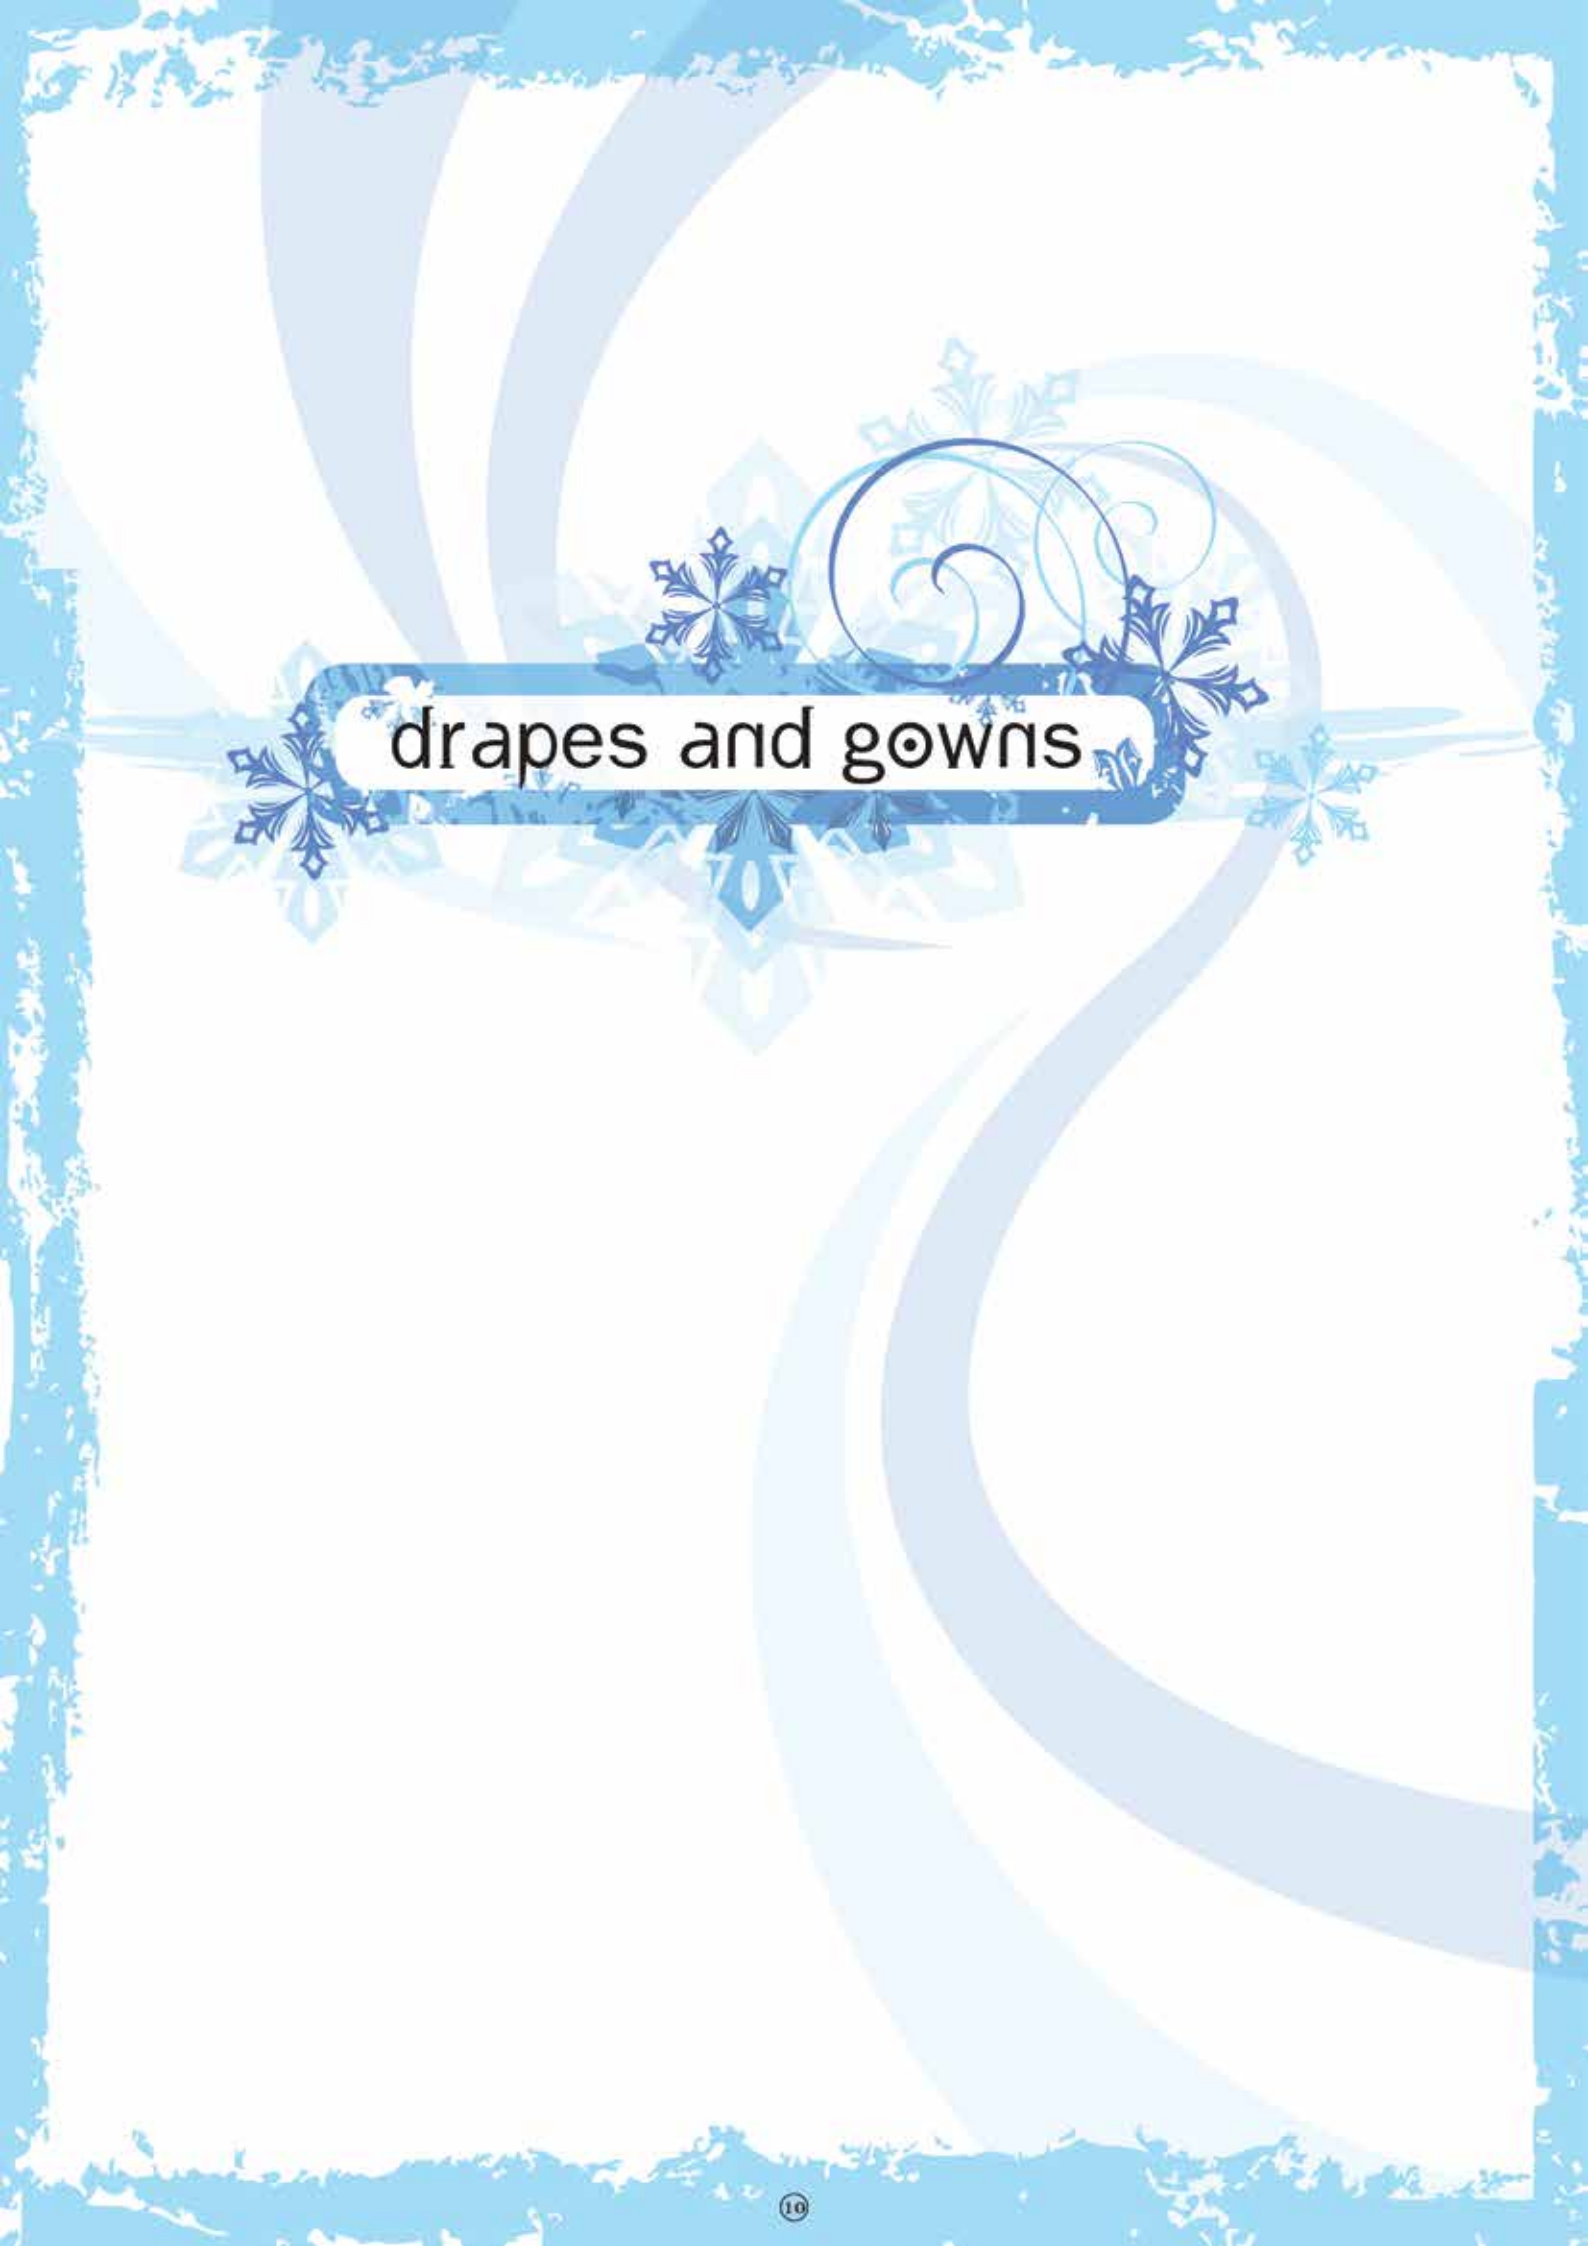

## GAUZE TAMPON

The tampon is an absorbent swab of spherical form with outer layer made of gauze with cotton wool absorbent core. Each tampon has a cotton thread attached which enables removal of the dressing from the body. It is especially recommended for gynaecological procedures.

The background features a light blue and white color scheme with large, flowing, abstract swirls. Scattered throughout are various sizes and styles of snowflakes, some with intricate patterns. A central horizontal banner with a dark blue background and white text is surrounded by these decorative elements.

# drapes and gowns

## SURGICAL GOWN:

Our surgical gown offers high level protection without compromising comfort. It's made of SMS, SMMS, SPUNLACE, SPUN BOND, and NON WOVEN FABRIC. The gowns provide good materials as air permeable protection, comfort and convenience even during prolonged operations, water replant, alcoholic replant, liquid replant and antistatic 100% breathe.

So it's easy to wear for prolonged surgery & gowns meet all demands of surgical use. The soft knit cuffs are not only comfortable but their length facilitate closed gloving.

## STANDARD SURGICAL GOWNS

It's made of SMS, SMMS, SPUNLACE, SPUN BOND, and NON WOVEN FABRIC. The nonwoven gown protects micro organisms and provides high comfort of work, connected with increased breathing of the material. The gowns provide good materials as air permeable protection, comfort and convenience even during prolonged operations, water replant, alcoholic replant, liquid replant and antistatic 100% breathe.

## REINFORCED AND BVB SURGICAL GOWNS

It is made of BVB, SMS, SMMS, SPUNLACE, and SPUNBOND NON WOVEN FABRIC.

**Breathable Viral Barrier (BVB)** fabric is a tri-laminate polypropylene based composite material with a breathable monolithic film. Provides excellent barrier properties against real world viruses causing infectious diseases such as HIV/AIDS & SARS.

The front and sleeve areas of the gown are made of an exceptionally soft, yet repellent fabric. The materials are 100% breathable, anti blood, anti alcohol. So it's easy to wear for long surgery.

Reinforced imperious zones on the arm & chest reinforcement offers superior strength and protection against strike through and also provides the extra level of comfort needed for extended procedures.

hygiene and protective products

## SURGEON CAP

we bring our clients a wide array of surgeon caps that are fabricated from high quality light air permeable spun bond fabrics. These are specially designed to protect the patient against dropping of hair / dandruff.

As these Caps & ties are Ultra sonically sealed therefore no manual Stitching or thread is required.

## MASK

Non woven disposable surgical face mask available in the type elastic or ear loop in 1, 2 or 3 ply . high air permeability special nose bow and dust free, hypoallergenic non woven provide high comfort of using .Bacteria Filtration Efficiency of above 99%. Surgical face masks protects the op fiels from contaminations, exfoliated epidermis, hair and droplet-borne infections. Available in sterile and non sterile version,in two colours – green and blue.

## BOUFFANT CAP

A bouffant cap is a type of cap that completely covers the hair for use in cleanrooms and other situations where it is important to avoid loose hairs. They are usually made of polypropylene or some other non-woven material, with an elastic band around the rim to keep it tight around the forehead and the back of the head below the hairline.

## SHOE COVERS

Hygienic shoe covers are made of special antiskid and anti-electrostatic film, tightened with an elastic band.

We manufacture a wide range of non-woven shoe covers which are made from durable & strong non-woven fabric which is manufactured from quality raw material. We also offer an assortment of shoe covers from a hygienic & reliable form of protecting clear-loom areas such as the OT, from the dirt accumulated on the user's foot area.

## BABY DIAPERS

Modern breathable hygienic products. The soft non-woven diaper top sheet enhances the comfort of usage. Each of 4 sizes (xs, s, m, l) given in the offer has got individual features that are adjusted both to size & stage of baby's development. Side cuffs and special non-woven cloth which distributes wetness on the surface of an absorbent core constitute additional protection from leakage.

## SANITARY NAPKINS

Thickness 3 mm, wings embossed channels, super absorbent core, neutralizes intimate smell, breathable, individually wrapped.

Three types of Ultra Thin napkins are created especially for more demanding women. Only 3 mm thin napkin assures super comfort and discretion.

The napkins are available in two sizes - 270 and 315 mm to satisfy all the clients. High absorbency is achieved thanks to the modern super absorbent core used in the production.

Breathable? - Yes. Your skin breathes with the napkin, the air goes through the napkin allowing the skin to breathe. It's covered with breathable film, therefore they are particularly skin friendly. This eliminates the possibility of skin irritation likely accruing after usage of the products with plain isolating film.

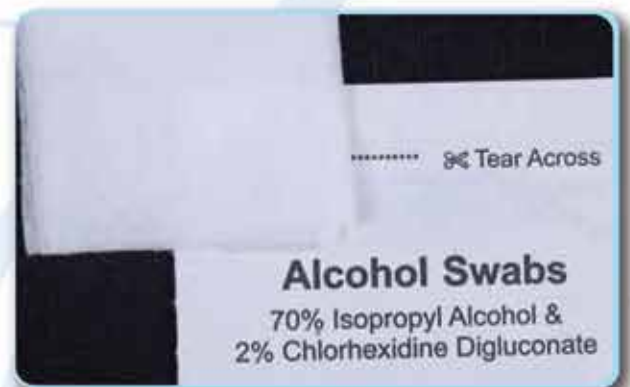

## WET WIPES

Soft & Strong they cleanse moisturize the skin. The pleasant talc fragrance and the cam mile extract. Wet wipes are produced as air-laid paper where the fibers are carried and formed to the structure of paper by air. They are moistened with water or other liquids like isopropyl alcohol depending on the applications. The paper might be treated with softeners, lotions or added perfume to get the right properties or "feeling". The finished wet wipes are folded and put in pocket size package or a box dispenser.

## ALCOHOL SWAB

Individually Foil Wrapped Convenient to Use Thicker, softer! 70% Isopropyl Alcohol for optimum anti-bacterial action. Use an antiseptic skin cleanser before injection.

## STERILIZATION FLAT REELS

The flat sterilization reels offered by us are constructed from medical sterilization paper and multilayer barrier films. All imprints are located outside the packing area to prevent ink pigment migration to the product. Transparent, multilayer co-polymer film allows easy identification These also come printed with double sterilization indicators for providing information on ethylene oxide, steam vapor processes & formaldehyde. Superior barrier with 60 gsm or 70 gsm medical kraft paper. Formaldehyde (FO) Indicator available upon request. Conformity with EN 868-5, ISO 11607

## ADULT DIAPERS

Adult diapers are designed for people with moderate and heavy incontinence. They can be used by both active and bed ridden people. Two levels of absorbency. Their outer layer is made of barrier film. Lack of latex so that the risk of skin allergies is reduced. The odour stop property prevents the development of embarrassing odour.

## UNDERPADS

Under pads are very important parts of care of people with urological problems. It is perfect bed protection made of cellulose pulp with SAP provides quick absorption and loss backup. The top layer of the under pad is made of soft, skin friendly non woven for better comfort. The underside of under pads is secured with anti skid and water proof layer which prevents the under pad from moving on sheet and doesn't allow any liquids to get out of the under pads.

## DISPOSABLE SKIN BLADE

Safe handle with sure grip ridges provides precise control. Easy to use handle lies in front of blade thus requiring only gentle pull instead of pressure.

Platinum coated stainless steel blades shave close without irritation. Open design provides optimal view of shaving area.

Most effective no need for more than one razor per procedure.

Unique design provides ultimate safety with cap for 100% hygiene surety.

## STERILE DRESSING SETS

The composition of specialist sets. Set is a combination of sterile products made of gauze, non woven, plastic materials and other materials used during surgical procedures such as cardboard kidney, forceps or gloves. The combination of a given set is chosen carefully in order to enable performance of a particular surgical procedure by opening only one sterile package.

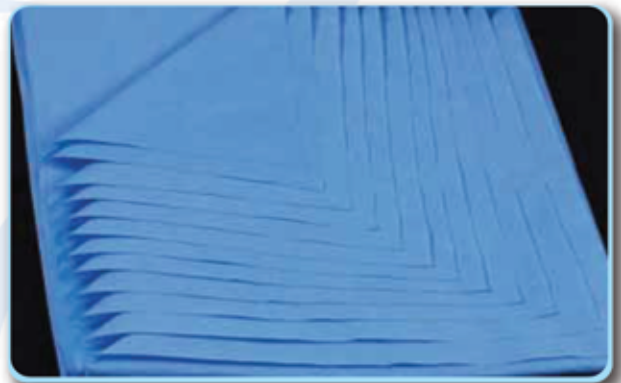

All the necessary components for routine dressing procedures are grouped, placed in the order of use and sterilized in a unique pack.

Most of the sets are wrapped in large field that, when opened, will automatically cover the working place creating immediately a sterile field. It's exclusively made by single use components.

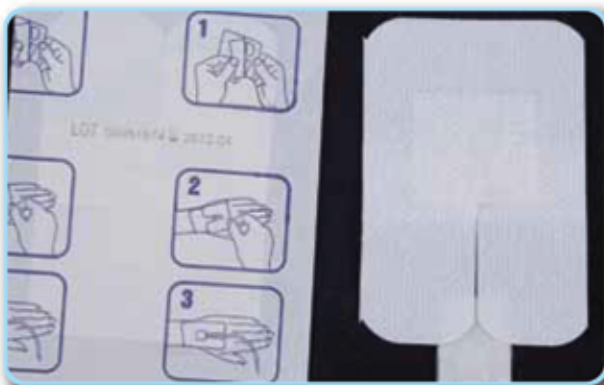

## WRAPPING SHEET

SMS Wrapping sheet is used to pack laundry items, and all heavy items that are to be sterilized SMS Sterilization wraps are tear proof and resistant non woven material made of polypropylene which is suitable for heavy duty applications. Four layer materials is made of two layers of spunbond which ensure extraordinary flexibility and drape ability and two melt blown layers form an efficient barrier against bacteria. Two sides with different tones enable to easily identify tears/damage to sterilized packs.

It is assigned for sterilization by steam, ethylene oxide or irradiation. the material is antistatic, dust free and it does not rustle nor reflect light .

## CANNULA PLAST

The carrier of the dressing is made of soft elastic non woven which enables easy adjustment to the body shapes. Cannula plast has a cutout for cannula ,which makes the application of a wound dressing easy and secure.

Each single cannula plast wrapping has an extra absorbent pad, which is to be placed under the cannula. The adhesive dressing is permeable to water vapour and air. Cannula plast protects an insertion point of the needle giving stability of the cannula and protecting the area against the risk of infection

## DISPOSABLE BEDSHEET & PILLOW COVERS

We manufacture hospital bed sheet & pillow covers printed or colored in non-woven pp spun bond, non woven spun lace. We can also print names or logos on disposables bed sheet. These are all available in all sizes depending on the requirement of the buyer. Due to the hygienic critene we manufacture the products.

## HOSPITAL BED SHEETS (BED LINENS) & PILLOW CASES

We offer 100% cotton percale superior bed sheets and pillow case for hospital-Size beds. A set includes one flat sheet, one pillow case. The color range includes white, semi white, shades of blue, green and pink and customize color.
